

CANADA WESTERN
AMBER DURUM
 WHEAT

AAC CURRENT

AAC Current offers high protein, very high test weight, and high HVK along with advances in agronomic performance, including improved standability and leading root rot resistance.

The result is higher yield potential without sacrificing the important grading factors that ultimately put more profit in your bin.

COMMIT TO QUALITY

Features:

- Improved yield from Strongfield
- Improved standability to Strongfield
- Strongfield/Navigator/Pathfinder/Avonlea parentage
- Protein = Strongfield
- R rated for Stem & Leaf Rust. Unique Resistance to Root Rot
- FHB, loose smut and general leaf spotting equal to Strongfield
- Improved stripe rust resistance

Crop Variety Evaluation Trial Data*
