

# 2020 SEED GUIDE

CELEBRATING

YEARS

ALLIANCE  SEED

# CELEBRATING 10 YEARS OF STRONG. VIGOROUS. DEPENDABLE.

Ten years is a milestone that provides us an opportunity to both reflect on our past and to look forward to our future.

Alliance Seed is a joint venture seed company owned by century old Canadian grain handlers Paterson Grain and Parrish & Heimbecker, and the farmer owned grain company, Northwest Terminal. Alliance Seed has grown exponentially; expanding our portfolio, our seed grower network and retail access points, and our end use participation. Most importantly, we have had the opportunity to play a small part in the success of Canadian farmers. Today, we operate in 10 different crop types, with 25 different varieties available through nearly 220 retail points in western Canada. We continue to work closely with our shareholders, their end use customers, our seed grower partners and our genetics suppliers to deliver our STRONG. VIGOROUS. DEPENDABLE. portfolio.

It all started with two varieties in our portfolio; AC Goodeve VB CWRS along with CDC Verona CWAD. AC Goodeve VB was one of the first midge tolerant CWRS lines that provided a solution to the problem of orange blossom wheat midge. CDC Verona was the first durum to come out of the breeding program of Dr Curtis Pozniak's at the Crop Development Center and had yield and agronomic improvements over varieties in the market. It quickly became one of the top selling durum varieties in western Canada.

AAC Elie was launched in 2014; it has been the core of the Alliance Seed brand. AAC Elie has consistently performed for growers all across the prairies with DEPENDABLE class leading yields, STRONG standability and VIGOROUS growth under all conditions. Alliance Seed has developed a culture of passion for seeking and delivering innovative seed solutions to our customers. We continue to lead the cereal seed segment with new genetics that will provide growers with the STRONG. VIGOROUS. DEPENDABLE. they expect from Alliance Seed.

AAC LeRoy VB, a new Midge Tolerant wheat from Dr. Santosh Kumar, AAFC Brandon, will be a significant step forward for yield potential in CWRS with MR for FHB that growers in all production zones will benefit from its yield and disease resistance.

CDC Endure, the first oats variety for Alliance Seed, will be a game changer with its top yields, strong standability and the high beta glucan content that end users want. Significant end user demand exist in advance of the variety being ready for launch in 2021.

CDC Aberdeen, a new yellow pea from DJ Beng, AAFC Lacombe will provide growers with yields and seed coat integrity to access the emerging markets of plant based protein.

On the 10<sup>th</sup> Anniversary of Alliance Seed, we want you to know that your trust and support has always been the biggest drivers for our continued growth! Building upon our industry leadership and expertise requires further dedication, commitment to customers, innovation, and continued execution of STRONG GENETICS, VIGOROUS PRODUCTION AND DEPENDABLE GROWTH. Our seed growers, our share holders and our customers have always been an integral part of our journey. Your satisfaction is what motivates us to thrive continuously in the market.

# AAC REDBERRY

CANADA WESTERN SPRING WHEAT

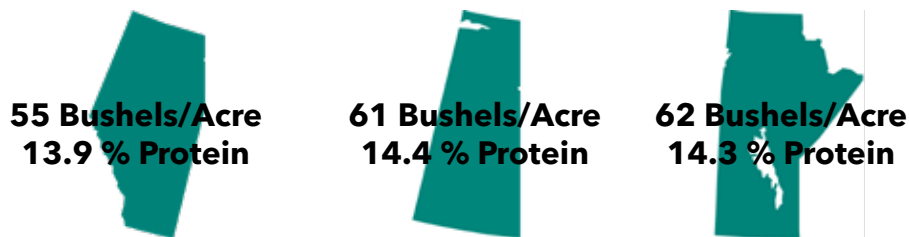

## ENJOY THE FRUITS OF YOUR LABOUR

AAC Redberry is a very early maturing, good standing, high protein CWRS. It has shown very high yields across all prairie production zones from the heat driven south, right up through the parkland regions.

### AAC REDBERRY FEATURES:

- **EARLY** maturity
- High yield potential
- High grain protein, HVK and test weight
- Semi-dwarf
- Awned

### YIELD & PROTEIN<sup>1</sup>

	Lodging	Sprouting	Height	Maturity

**NEW**

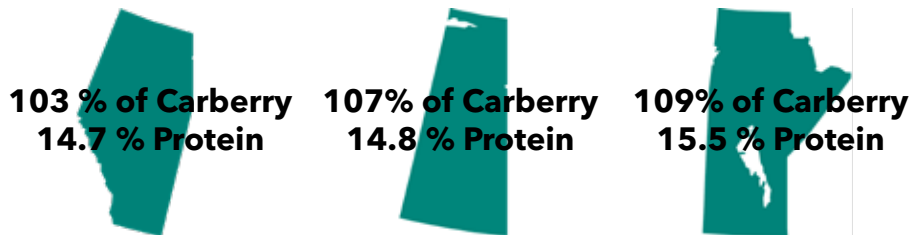

## HARD TO SAY, EASY TO GROW

SY TORACH Pronunciation /TOR·ak (Gaelic) ADJECTIVE; Fruitful, high yielding. SY Torach offers increased yield while providing a protein boost over the most commonly grown CWRS varieties in the market today. SY Torach maintains the short, strong standing semi dwarf characteristics growers are after, and improves disease resistance with an strong MR for FHB.

### SY TORACH FEATURES:

- Improved protein levels
- Excellent yield with short plant height for ease and speed of a big harvest
- MR for FHB, R for Loose smut and Leaf and Stem Rust allowing for an easier disease management strategy

### YIELD & PROTEIN<sup>2</sup>

# ELEVATE YOUR EXPECTATIONS

AAC Elie is a high yielding strong strawed, semi-dwarf CWRS variety with good resistance to fusarium headblight. Since launch in 2014, wheat growers across the prairies have praised AAC Elie for consistent high yields and good grade results across all soil types and environmental conditions.

## AAC ELIE FEATURES:

- Consistent high yield performance across all production zones, weather conditions and management levels
- Fast, efficient harvest
- Good sprouting resistance
- Easy to thresh, and no shattering issues

## YIELD & PROTEIN<sup>1</sup>

	Lodging	Sprouting	Height	Maturity
<b>AAC ELIE</b>	<b>VG</b>	<b>G</b>	<b>80 cm</b>	<b>99 days</b>

**NEW**

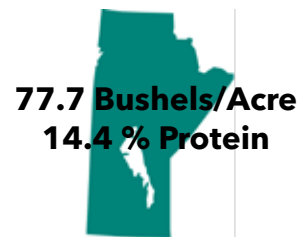

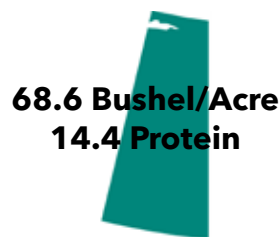

AAC LeRoy VB is the most exciting variety to be recommended in recent years. With an amazing combination of yield, disease resistance and midge tolerance, AAC LeRoy VB will quickly make it the go-to variety for farmers across western Canada.

## AAC LeRoy VB FEATURES:

- AAC LEROY VB raises the standards for CWRS yields, with yields of 13% more than Carberry and 10% over UnityVB in registration trials.
- Semi dwarf with standability make AAC LEROY VB a good choice for all wheat growers across the prairies; not just the midge tolerant sectors.
- MR for FHB.
- Sm1 Resistance

## YIELD & PROTEIN<sup>3</sup>

# ADVANCED GENETICS FOR MODERN FARMING

Prairie durum growers invest heavily in innovation and technology to maximize production responsibly. By setting the new standard for yield potential without sacrificing important agronomic characteristics, CDC Precision stands out as the elite option for today's progressive farmer.

## CDC PRECISION FEATURES:

- Very high, consistent yields across all durum growing areas
- Strong standing
- MR or R rated for all rusts
- FHB resistance similar to Brigade

## YIELD & PROTEIN<sup>4</sup>

	Lodging	Sprouting	Height	Maturity
<b>CDC PRECISION</b>	<b>G</b>	<b>F</b>	<b>93 cm</b>	<b>101 days</b>

## GET GROWIN' WITH SY ROWYN

SY Rowyn offers wheat growers consistently high yields, good straw strength, and very good disease resistance, including strong tolerance to FHB infection. SY Rowyn is a variety that Canadian producers can use to push their wheat yields higher while maintaining access to milling markets.

### SY ROWYN FEATURES:

- Very high yield potential; averaging 15% higher than leading CWRS varieties across all production zones
- Strong FHB resistance (MR)
- Semi-dwarf with excellent threshability

### YIELD & PROTEIN<sup>1</sup>

	Lodging	Sprouting	Height	Maturity
<b>SY ROWYN</b>	<b>G</b>	<b>F</b>	<b>77 cm</b>	<b>98 days</b>

Carberry	MR	R	MS	MR	R	MR	MR

## **AAC PREVAIL VB** BRED FOR SUCCESS

AAC Prevail VB is a Midge Tolerant CWRS variety which offers producers a significant step forward in yield performance and grade retention. Bred as the replacement for AC Unity, AAC PrevailVB retains all the grade quality characteristics AC Unity is known for, with improvements to yield, standability and disease resistance.

### **FEATURES:**

- High yield potential
- Midge Tolerant
- Good disease resistance including FHB
- G for sprouting resistance with high grain protein.
- Awnless

## **AC GOODEVE VB** FIRST FOR MIDGE TOLERANCE

AC™ Goodeve VB was one of the first Midge Tolerant lines to enter the market and remains popular with CWRS growers, particularly in the parkland region of Saskatchewan. AC™ Goodeve VB is one of the best midge tolerant lines for standability and grain protein, and matures very early to help producers manage their harvest work load.

### **FEATURES**

- Early maturity with excellent yield potential
- Proven excellent grade results
- High protein
- Midge Tolerant
- Awnless

## **CDC VERONA** EASY THRESHING. HIGH YIELDING. EXCELLENT STANDABILITY

CDC Verona is known and trusted by many CWAD growers as the go to variety for strong standability, threshing efficiency and solid grading results.

### **FEATURES:**

- Good yield potential
- Strong standing
- Proven grade retention
- Excellent Rust resistance

## **AAC INNOVA** GROW FUEL IN YOUR FIELD

AAC Innova CWSP has shown class leading yields, with agronomic features including short, strong straw to ensure that big bushels do not require a big time commitment at harvest. With soft white wheat parentage, low protein, and high starch content, AAC Innova is the coveted variety of choice for ethanol production across the prairies.

### **FEATURES:**

- Very high yield potential
- G for standability
- Excellent ethanol variety
- Easy harvestability
- Early maturity for the class
- Awned

## **AAC ICEBERG**

### **FEATURES:**

- High yield
- Excellent standing, short CWHWS
- Early Maturity
- Good Resistance to Rust
- I for FHB

**AVAILABLE  
FALL 2019**

**AB CATTLELAC**

**BARLEY**

**NEW**

## “ESCALADE” YOUR EXPECTATIONS OF QUALITY AND PERFORMANCE

AB Cattlelac is a NEW semi-smooth awned barley that was **ranked #1 for forage yield** in 2 years of Coop testing. Coupled with good lodging resistance, great grain yield and excellent disease resistance, livestock producers can feel confident AB Cattlelac is the luxury barley of choice for their operations.

### AB CATTLELAC FEATURES:

- Excellent forage and grain yields throughout registration trials
- Featured in Grainews and Western Producer; described as an “incredible” new variety
- High cow capacity
- Improved lodging over AC Ranger
- Semi-smooth awned 6 row

### YIELD<sup>5</sup>

**6.785 Tonnes/  
Hectare**

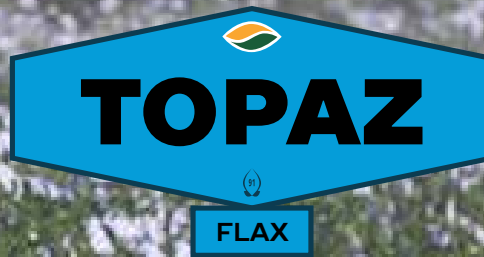

**5.787 Tonnes/  
Hectare**

**6.929 Tonnes/  
Hectare**

**AVAILABLE  
FALL 2019**

**NEW**

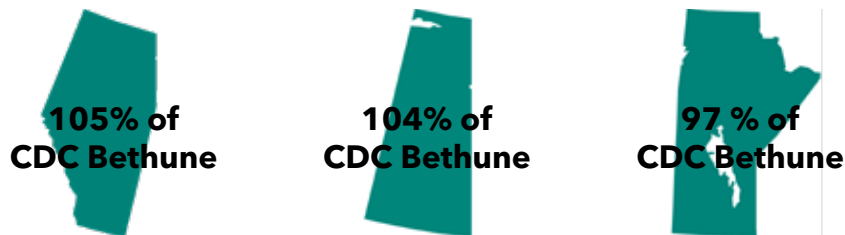

## **A NEW JEWEL ON THE PRAIRIES**

Topaz is a NEW flax variety available to flax growers featuring good yield potential, excellent lodging resistance, and the high oil content flax marketers covet.

### **TOPAZ FEATURES:**

- Increased yield over check varieties in provincial testing
- Early maturity
- Improved lodging resistance

### YIELD<sup>6</sup>

	Lodging	Height	Maturity
<b>TOPAZ</b>	<b>G</b>	<b>55 cm</b>	<b>102 days</b>
CDC Bethune	G	58 cm	102 Days

	Fusarium Wilt	Powdery Mildew
<b>TOPAZ</b>	MR	MR
CDC Bethune	MR	MR

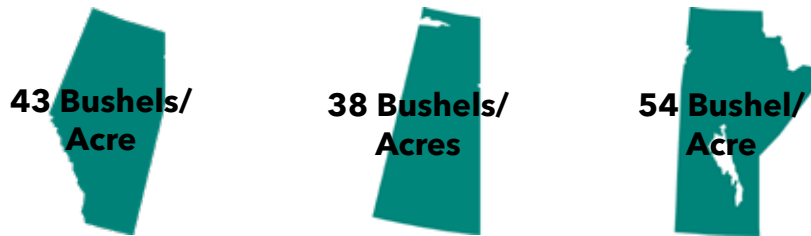

AAC Lacombe is a top yielding, medium maturity, semi leafless, medium sized, yellow pea variety with leading standability and excellent resistance to powdery mildew. AAC Lacombe’s medium seed size strikes an excellent balance between the small seeded varieties commonly grown, and the robust seed size coveted by niche pulse food markets.

## AAC LACOMBE FEATURES:

- Top yield performance
- Excellent Standability
- Medium seed size (250 g)
- I rating for Fusarium Wilt
- Yellow Pea

### YIELD<sup>1</sup>

	Maturity	Vine Length	Lodging (1-9)	TSW
<b>AAC LACOMBE</b>	M	85 cm	3.5	250
CDC Amarillo	M	85 cm	3.5	230

# COMING SOON

## YELLOW PEAS - Launching Fall 2021

AAC Aberdeen Yellow Field Peas combine a medium sized seed, high yield potential and excellent lodging resistance to make harvesting and handling a breeze. See how AAC Aberdeen yellow field peas fit for your farm.

### AAC ABERDEEN FEATURES:

- Higher yields than CDC Amarillo and AAC Lacombe
- Smaller seed size and improved seed coat integrity to make handling easier
- Semi leafless
- Excellent resistance to powdery mildew.

## OATS - Launching Fall 2021

CDC Endure is a new oat variety from Dr. Aaron Beattie of the CDC. With yields higher than AC Morgan, CDC Endure sets a new benchmark for yield and quality across western Canada and will be a oat variety that growers will choose to grow for many years.

### CDC ENDURE FEATURES:

- Top yielding line across all of western Canada in Oat Registration Trials.
- Strong Standability
- High tests weights
- Consistently high Beta glucan content
- Medium Maturity
