

ALLIANCE SEED SY TORACH

2021 TECH SHEET
ALBERTA & WESTERN SASKATCHEWAN

SY Torach Pronunciation/TOR•ak (Gaelic) ADJECTIVE; Fruitful, high yielding. SY Torach offers increased yield while providing a protein boost over the most commonly grown CWRS varieties in the market today. SY Torach maintains the short, strong standing semi dwarf characteristics growers are after, and improved disease resistance with a strong MR for FHB

SY TORACH FEATURES:

- Tremendous standability with short plant height for ease and speed of a big harvest
- Improved protein levels over comparable CWRS varieties
- Excellent yield
- MR for FHB, R for Loose smut and Leaf and Stem Rust allowing for an easier disease management strategy
- Parentage: BW874//01S2120-40

GROWING EXPERIENCE

“SY Torach was our first wheat seeded in 2020. Field was VR for 5 years. We didn’t think this variety had the potential to yield as it did. It did not lodge, even through a one time 6-7” rain and wind event. We did swath it, due to second growth which was an issue in our area with most cereals this year. The yield scale @ harvest, 93.65 bu/acre, protein at 14.0 tested at 3 different elevators. Overall, SY Torach harvested great with a great looking sample. It will be a great variety for NW Saskatchewan. - Denis Gregoire, Gregoire Seed Farms, North Battleford, Saskatchewan.

SY TORACH YIELD & AGRONOMY*

		Carberry	AAC Viewfield	AAC Brandon	SY TORACH
Yield (% of Carberry)	SK	100	109	106	104
	AB	100	108	103	98
Protein (%)	SK	14.5	14.0	14.2	14.7
	AB	13.9	13.5	13.6	14.3
Maturity (days)		102	103	102	101
Height (cm)		81	79	81	84
Lodging		VG	VG	G	VG
Sprouting		F	G	P	F
Loose Smut		MR	S	MR	R
Common Bunt		R	MR	S	MS
Leaf Spot		MS	I	I	MR
Stem Rust		MR	R	R	MR
Leaf Rust		R	MR	R	R
Stripe Rust		MR	R	MR	MS
FHB		MR	I	MR	MR
