

**EVERY SEED STARTS A STORY.** 

**SEED GUIDE 2024** 

# Every seed starts a story.

Farming is good at growing stories. There are the hard days and ones that come easy. There are times when the rain comes and others when moisture is missing. There are belly laughs and coffee breaks and long days of harvest with family. Win or lose, every year becomes a tale told between the people who were there.

The story of the next growing season starts with seed. Growers like you trust us to get the opening right. Years of research in yield, disease resistance, maturity, and grain quality come together to produce a line-up of seed packed with top performers. Great stories start with unparalleled potential.

We work with the best seed growers and most committed retailers to provide the highest quality seed. Our varieties produce high-yielding, profitable crops. We're owned by three Canadian grain companies and their connections give us unique insight into global market trends. We make sure you're growing what customers want.

This Seed Guide is the start of the next chapter of your operation.

Let's start writing.

CDC Endure sets the benchmark for yield and quality in oats across western Canada and is the variety that growers will choose for many years.

#### **CDC ENDURE FEATURES:**

- **Top yielding** oat variety across all of western Canada outyielding AC Morgan and CS Camden in 2022 MCVET, SKVPG and ARVT trials.
- Strong standability
- · Earlier maturity than CS Camden
- High test weights
- · Consistently high **Beta-glucan content**

Data compiled from 2022 MCVET, SKVPG, ARVT trial programs

AAC Leroy VB CWRS has the amazing combination of high yields, disease resistance and midge tolerance, as well as consistent harvest quality that makes AAC Leroy VB a go-to variety for farmers across western Canada.

### **AAC LEROY VB FEATURES:**

- AAC Leroy VB raises the standards for CWRS yield with higher yields than many comparable varieties; out-yielding AAC Viewfield by 11% and AC Unity VB by 10% in Western Canadian Registration trials
- Semi-dwarf with strong standabilty make AAC Leroy VB a great choice for all wheat growers across the prairies
- Excellent disease resistance, including MR for FHB, MR for Leaf Rust, Stem Rust and Stripe Rust
- Wheat midge resistance from SMI gene

91

CDC Envy is an exciting new CWRS that is early maturing, high yielding and comes with a very good standing, semi-dwarf structure.

CERTIFIED SEED WILL BE AVAILABLE FALL 2024.

#### **CDC ENVY FEATURES:**

- Yields of 114 % of the mean of check cultivars in the 2018-2020 Parkland Coop Trials
- Early maturity
- Semi-dwarf
- Good lodging resistance
- Excellent disease package

	CDC ENVY AGRONOMIC INFORMATION <sup>2</sup>									
	Yield Maturity Height Lodging (% of Carberry) (days) (cm) (1-9) Test Wt TKW Protein

CDC Envy 114 -3.1 85.9 2.0 80.8 39.0 13.9										

<sup>2.</sup> Data compiled from 2018-20 Parkland Wheat Cooperative Test.

AAC Redberry distinguishes itself as the industry standard for an early maturing, high yielding CWRS with high yields and good standability. It has built a reputation for maintaining quality even through challenging harvest conditions.

#### **AAC REDBERRY FEATURES:**

- Early maturity, in field results as much as I week earlier than other CWRS varieties
- High grain protein, HVK, and test weights, even under adverse harvest conditions
- High yield potential, 115 % of checks through registration trials
- Semi-dwarf

MIDGE TOLERANT WHEAT Plant-Protect-Preserve

91

AAC Elie continually proves to be a superior strong strawed semi-dwarf CWRS variety with good resistance to fusarium head blight. AAC Elie growers repeatedly comment on its high yields, good grade results and consistent performance across all environments and production areas.

#### **AAC ELIE FEATURES:**

- High grain yield
- Short strong straw
- · High test weight
- Disease resistance

AAC Weyburn VB proves you can have it all; a high yielding durum variety with great
standability and disease resistance, along with the protection of midge tolerance
and stem sawfly resistance.

#### **AAC WEYBURN FEATURES:**

- High yields, outyielding CDC Precision in the 2022 ARVT and SKVPG trials
- Midge tolerance and stem sawfly resistance
- Great standability
- Medium height

<sup>3.</sup> Data compiled from 2022 SKVPG trial program

CDC Precision CWAD continues to raise the bar for durum in western Canada with its package of yield and agronomic characteristics that durum growers demand and is the variety to beat for many producers in the CWAD growing regions of western Canada.

#### **CDC PRECISION FEATURES:**

- CDC Precision sets the bar for yields in durum with **very high consistent yields** across all durum growing areas
- Strong standing
- MR or R rated for all rusts
- FHB resistance similar to Brigade

CDC PRECISION AGRONOMIC INFORMATION <sup>3</sup>								
	Yield (As a %	of Check)	Protein	Lodging	Maturity	Usiah+		
	SK Area 1&2	SK Area 3&4	(%)	Lodging	(Days)	Height

<sup>3.</sup> Data compiled from 2022 SKVPG trial program

It will be (CDC) Evident that durum growers will choose this variety to grow as soon as possible. CDC Evident is the newest, highest-yielding CWAD currently registered and looks very strong in all durum growing areas.

CERTIFIED SEED LAUNCH IS SCHEDULED FOR SPRING 2026.

#### **CDC EVIDENT FEATURES:**

- High grain yield; yielding higher than all check cultivars in the Western Canadian Durum Coops 2021-2022
- · Disease resistance; R to leaf, stem and stripe rust and common bunt
- Excellent end use suitability

CDC EVIDENT AGRONOMIC INFORMATION <sup>3</sup>

GET READY FOR THE POWER OF AAC Vortex. AAC Vortex combines the power of high grain yield, excellent winter hardiness, short strong straw, medium maturity, excellent disease resistance and grain quality into a variety that will expand your expectations of a winter wheat.

**AAC VORTEX** 

#### **AAC VORTEX FEATURES:**

- Higher grain yield than all of the checks in Alberta and in the Parkland regions of Saskatchewan and Manitoba
- Excellent winter survival
- · Shorter than Emerson with excellent lodging resistance
- Excellent disease package with R ratings for Leaf Rust, Stem Rust, and Stripe Rust and MR for FHB

AB Cattlelac is a semi-smooth awned barley that was **ranked #1 for forage yield** in 2 years of registration trials. Coupled with good lodging resistance, great grain yield and excellent disease resistance, livestock producers can feel confident AB Cattlelac is the luxury barley of choice for their operations.

#### **AB CATTLELAC FEATURES:**

- Excellent forage yield throughout registration trials; 105% of AC Ranger.
- Grain yields similar to other high yielding feed barley varieties
- High cow carrying capacity
- Improved lodging over AC Ranger
- · Semi-smooth awned 6 row

# COMING SOON

AAC Perform CPSR; the name says it all. High yield potential, excellent standability and a great disease package, this variety has it all. Growers will be thrilled with (AAC) Perform. Launching for Certified Seed Sales in 2025.

**CERTIFIED SEED LAUNCH SCHEDULED FOR FALL 2025.** 

This two-row barley variety delivers exceptional performance across various yield conditions, consistently outperforming key benchmarks across different geographical regions. Yield plus early maturity, robust standability, and comprehensive disease resistance will make you a fan of both AS Manon and AS Lafleur.

CERTIFIED SEED LAUNCH SCHEDULED FOR 2026.

No matter what team you cheer for, there is no denying the talent of AS Lafleur. AS Lafleur is a two-row barley with consistent high performance across all yield environments. With a shorter stature and very good lodging resistance, excellent quality and disease resistance, AS Lafleur will be an MVP on your farm. CERTIFIED SEED LAUNCH SCHEDULED FOR FALL 2026.

# AAC Aberdeen is a **top yielding**, medium maturity, semi-leafless, medium sized, yellow pea variety with leading standability and excellent resistance to powdery mildew. AAC Aberdeen's medium seed size strikes an excellent balance between the small seeded varieties commonly grown, and the robust seed size coveted by niche pulse food markets.

#### **AAC ABERDEEN FEATURES:**

- · Highest yielding yellow pea in provincial trials
- Excellent standability
- Medium seed size (250 g)
- I rating for Fusarium Wilt

### **ALLIANCE SEED OT6036 FORAGE OAT**

OT6036 variety distinguishes itself with its erect growth structure, exceptional tillering capacity, and improved resistance to lodging, surpassing the characteristics of CDC Haymaker. Notably, OT6036 is redominantly awnless, making it a versatile choice for inclusion in a producer's feed program, as well as an excellent candidate for cover crop or multicropping systems. OT6036 WILL HAVE A VUA AGREEMENT. **CERTIFIED SEED LAUNCH IS SCHEDULED FOR FALL 2026.** 

Boasting enhanced yields in comparison to the averages of the standard checks in the Western Canadian Pea Co-op trials 2021-22. CDC Engage also offers improved protein content and reduced seed coat breakage over checks.

**CERTIFIED SEED LAUNCH IS SCHEDULED FOR FALL 2026.** 

CDC 5845 comes to Alliance Seed from the LimaGrain/SPG collaboration. CDC 5845 will provide growers with a boost in yield over typical yellow pea checks along with improved protein content and an improved seed coat breakage. CDC 5845 WILL HAVE A VUA AGREEMENT.

**CERTIFIED SEED LAUNCH IS SCHEDULED FOR FALL 2026.**
