

Make the neighbors envious... CDC Envy is an exciting new CWRS wheat variety that's turning heads in the field! With early maturity that gets you harvesting faster and high yields that outpace the competition, this variety also features semi-dwarf standability. CDC Envy will ensure your crop to becomes the talk of the town.

# **CDC Envy strengths:**

- Excellent yields, higher than comparable checks
- Early maturity making it efficient for harvest management
- Reduced plant height
- Semi-dwarf standability
- Lr22a carrier

# **CDC Envy neutral traits:**

I to FHB

Parentage: CDC Go\*4/04GC139/3/W09130/2/CDC Go\*2/ CDC Alsask

<sup>1</sup> Leaf Spots rating is a combination of resistance to tan spot, spot blotch and septoria leaf disease complex. 2 Fusarium head blight (FHB) infection is highly influenced by genetics, environment and heading date. Under high levels of disease pressure, all varieties will experience yield and/or quality loss.

 $M=Medium,\ L=Late,\ VL=Very\ late,\ G=Good,\ VG=Very\ good,\ P=Poor,\ VP=Very\ Poor,\ F=Fair,\ R=Resistant,\ MR=Moderately\ Resistant,\ MR=Moderately\ Res$ 

I=Intermediate Resistance, MS= Moderately Susceptible, S=Susceptible
