

ALLIANCE SEED SY ROWYN

SY Rowyn offers wheat growers consistently high yields, good straw strength, and very good disease resistance, including strong tolerance to FHB infection.

SY Rowyn is a variety that Canadian producers can use to push their wheat yields higher while maintaining access to milling markets.

SY Torach requires a Syngenta Stewardship agreement upon purchase.

SY Rowyn strengths:

- Good tolerance to rusts and FHB relative to CPSR checks
- High Protein
- Good milling and baking characteristics relative to CPS checks
- High yield in zone 1

SY Rowyn neutral traits:

- High test weight, maturity and straw strength are all within range of checks, shortest

SY Rowyn weaknesses:

- Susceptible to common bunt

¹ Leaf Spots rating is a combination of resistance to tan spot, spot blotch and septoria leaf disease complex. ² Fusarium head blight (FHB) infection is highly influenced by genetics, environment and heading date. Under high levels of disease pressure, all varieties will experience yield and/or quality loss.
